## Introduction

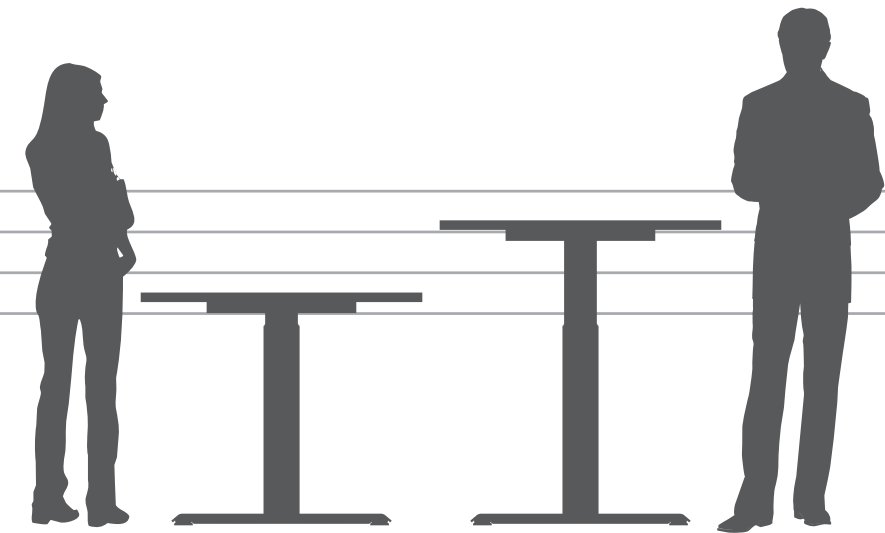

BRC's Emotion series is a tested and proven height adjustable solution both in the lab and in the field. The product has sustained over 20 years of success and during that time undergone constant refinements and improvements. Rugged construction and reliable electronic components have been tested and certified to ANSI BIFMA & CGSB standards assuring the highest quality.

## A workstation for everyone

Stationary desks and workstations present a problem to natural instinct. The human body is designed to benefit from motion which is important for spinal health, improving circulation and reducing muscle fatigue. Height adjustable tables can encourage movement by offering the user multiple sitting and standing positions.

Another benefit is the ability for the user to adjust the desk to the optimal working height for their body both in a sitting and standing position. Even two people who are the same height may have different resting elbow positions and in turn prefer different sitting and standing heights. The benefit is that a workstation can accommodate virtually all users at a cost that is only marginally higher than a fixed height desk. In turn providing the user an opportunity to break their static posture without leaving the work area.

Height adjustable tables can also provide an inclusive atmosphere for everyone. BRC's line of Mesa and Viva height adjustable electric desks provide a modesty free ADA solution that is wheelchair accessible. In addition, both product lines offer a collision free mechanism that stops table movement when resistance is encountered, preventing injury.

# Mesa

## Economical electric height adjustability

With the push of a button, Mesa can move from sitting to standing, and everywhere in between. Style and design meet effortless adjustment and sturdy design. Mesa is BRC's most affordable height-adjustable table.

### Features:

- Height adjustment from 22.75" to 48.50"
- Dual motor with a lift capacity up to 275lbs
- Power rated at 456W, 3.8 Amp working, 0.5W standby
- 108" Power cord length
- Worksurface 1" LP laminate or HP laminate in all standard BRC laminates
- Lifting columns, trim & frame in powdercoat silver, black or white
- Programmable Anti Collision enabled: - table will stop if obstruction is encountered
- Fully adjustable width frame virtually eliminates lateral movement
- Modesty free design meets ADA accessibility requirements
- UL Certified electronics

## Right at home

With work patterns shifting to transient or home based offices, ergonomics and healthy working postures are just as crucial as they were in the traditional office. BRC height adjustable desks and storage accessories make a great combination while providing the same user friendly design. ANSI-BIFMA testing ensures that commercial grade quality BRC products will perform just as well at home as in the office. In addition, BRC has a wide range of laminate and edge finishes tailored to fit the home decor, including antibacterial surface options. A carefully selected range of handle options and colours allows the client endless possibilities.

## Tailor the space

If the standard offering doesn't fit the space, BRC can design and build a custom solution to suit the clients requirement. Our laminate design and expertise is far reaching, let us know your challenge and we can make it work.

# Viva

## Research based height adjustability

Viva is bred from over 30 years of furniture manufacturing experience, including a timeless, adaptable array of excellent quality ergonomic tables and workstations. Viva offers a highly engineered low profile foot which is constructed of drawn steel, with waterfall front and back edges. All tables are optionally available with casters, wire management, ganging systems, floating monitor platforms, keyboard platforms, modesty panels and other accessories.

### Features:

- Superior quality tables
- Barrier-free access
- Optional floating modesty panel
- 24" - 36" height range for manually operated
- 22" - 48" height range for electric
- 300 lbs electric lift capacity with 1.5" per second travel
- Meets or exceeds ANSI/ BIFMA standards
- Custom configuration and capabilities to suit any workstation
- Bluetooth, battery operation & App, remote control available

Available finishes include all of BRC's standard LP and HP laminate options. Base colour is available in black, silver and white powder coat. The Viva line features a matching foot base in electric, manually operated, incremental and fixed height table. Viva electric can be optioned with bluetooth functionality which integrates with an iOS and Android app.

The app can be configured to save custom heights or create a health plan that reminds you when to stand if you've been sitting for too long. Additional options include a rechargeable battery for cord free operation and multiple handset variations.

# SoHo

## Adjustable height design at its best

BRC is taking health-positive movement to a new level with this attractive adjustable-height desk that moves seamlessly and quietly from sitting to standing.

The Emotion product line SoHo includes a new executive base format for a clean, sharp, ergonomic solution for managerial applications. SoHo features an advanced control handset that allows users to track how many minutes and calories they accrue by standing during the day. An alarm function also reminds users when it's time to stand.

### Features:

- Floating modesty panel
- Moves seamlessly and quietly from sitting to standing
- 1 box / 1 file pedestals on each side
- 350 lb lift capacity
- Multiple handset controller options
- Range from 26" to 52"
- 84" x 30" deep, 4" tall legs
- Custom sizes available

# NoLita

NoLita is BRC's newest electric height adjustable table. Ideally suited for private office providing an enclosed frame, reduced foot space and integrated modesty panel available in frosted or patterned screen. NoLita can also be used as an open plan meeting table with option for both surfaces to be height adjustable.

*Items Shown: NoLita Height Adjustable Table with Storm base, Mimosa worksurface and black frame. Custom designed wall mounted storage and shelving in Mimosa laminate with white back painted glass; contact BRC for details.*

# Executive decision

Now the executive private office can have the same health benefits that open plan height adjustable tables offer. Hidden frame and mechanisms contribute to a clean aesthetic while providing an upscale environment.

Items shown: SoHo table in Nova White with Ginger Root fronts & modesty. BRC storage behind in matching laminate.

## Desk Control app

# Thank you for considering BRC

## Built in North America

Established in 1979 and incorporated in 1983, the BRC Group has grown into a leader in the research, development and manufacturing of high quality ergonomic furniture and architectural walls. BRC is a Canadian owned private company with modern manufacturing facilities in Georgetown, Ontario, Canada.

All materials are both regionally and internationally sourced, assuring that only the best raw materials are converted to finished goods. BRC is committed to developing and offering the best-value products for the middle to higher end markets.

## Tailored products

From obscure designer requests to simply trying to be better, BRC provides creative and innovative customized solutions to complement any environment and use. Flexible manufacturing offers the ability for BRC to respond to client's special custom needs rather than having standard catalogue solutions. A wide collection of textiles, laminate finishes and wood allows companies and individuals to express their brand and culture through a unique signature look.

## Reliable construction

All furniture is designed and manufactured to meet and exceed ANSI-BIFMA standards. Standard construction uses a combination of 3/4 and 1" material with optional 1-1/2" tops and metal to metal connections for a solid long-lasting construction. The newest edge banding technology, in which the edge tape is melted directly to the edge of their board, enables BRC to manufacture products with virtually invisible glue lines.

## Design and production in a sustainable way

BRC is a forerunner in blending environmental initiatives with the manufacturing of renewable and recyclable products. The sustainability and recyclability of the products are indispensable requirements as for quality of materials, versatility, utility and ergonomics. BRC uses materials and manufacturing processes which reduce Volatile Chemical (VOC) emissions in the office environment.
